

REGARDING OUR APPLIANCE

Our doctors treat a very wide range of health and dental diseases, dysfunctions, disabilities and deficiencies. Each of these problems requires different types of treatments, with different levels of difficulties. Therefore, any of the appliances, devices, obturators and splints provided as part of treatment do not include the cost of periodic adjustments and office visits following delivery or insertion of them.

Unlike some other offices, we do not set one very high fee for an appliance or treatment that includes all adjustments and office visits, as we feel that would be unfair to many patients. Such a charge does not reflect the differences in complexities of our patients' treatment needs.

We hope this clarifies our policy. If you have further questions, please consult our office manager.
